Full Stack Developer | PHP, Laravel, JavaScript, MySQL

Belgrade, Serbia | +381 65 209 90 29 | miloskomljen2008@gmail.com | github.com/miskebg | linkedin.com/in/milos-komljen/ | miskebg.github.io

PROFESSIONAL PROFILE

Full Stack Developer with 10+ years of experience building business web applications, Laravel/PHP backend systems, REST API integrations, admin panels, and automation tools for operational workflows. Delivered custom solutions for HoReCa, SaaS, retail, and service-based industries, including ERP integrations, analytics dashboards, ordering systems, loyalty flows, and digital contract platforms. Strong at translating business processes into stable, maintainable, and measurable digital products.

KEY RESULTS

- Developed 20+ custom web applications for clients across HoReCa, SaaS, retail, and service industries.
- Improved application performance by up to 40% through database optimization, backend refactoring, and more efficient queries.
- Delivered production systems processing 1,000+ daily API requests and supporting multiple business users.
- Digitized the contract generation workflow and reduced manual work by 60% through online signing and PDF export.

TECHNICAL SKILLS

Backend	PHP OOP, Laravel, MySQL, MS SQL, REST APIs, JSON, OAuth, JWT
Frontend	JavaScript, HTML5, CSS3, Bootstrap, jQuery, responsive UI implementation
CMS & Web	WordPress theme development, custom websites, e-commerce websites, HTML-to-WordPress conversion
Integrations	Pantheon ERP API, Google Fit API, OneSignal, order, pricing, and business data synchronization
Infrastructure	Linux, Hetzner Cloud, cPanel, Docker basics, Windows Server, networks, and hardware
Tools	GitHub, Postman, Figma, VS Code, Adobe Photoshop, Dreamweaver, Microsoft Office

WORK EXPERIENCE

Freelance Full Stack Developer | Self-employed, Belgrade | 2015 - Present

- Designed and developed Laravel/PHP backend systems, REST APIs, admin panels, reporting modules, and user workflows for business clients.
- Integrated ERP systems to automate order processing, price synchronization, and reliable data exchange between sales, administration, and operations.
- Built analytics dashboards for tracking orders, sales performance, user insights, and operational KPIs.
- Owned the full development lifecycle: requirements analysis, architecture, implementation, testing, delivery, and production support.

Web Developer | LMG Group, Belgrade | 2013 - 2015

- Developed and maintained WordPress websites, custom themes, and web applications for business clients.
- Converted HTML templates into functional WordPress themes using HTML5, CSS3, JavaScript, and jQuery.

Administrator / Web and IT Support | LMG Group, Belgrade | 2008 - 2013

- Maintained WAP and web portals, internal applications, computer systems, software, and network infrastructure.

SELECTED PROJECTS

HoReCa B2B Platform: ERP-integrated ordering system with real-time synchronization, dynamic pricing, and automated order workflows.

Food Ordering App: Laravel-based food ordering system with user management, order tracking, user insights, and sales analytics.

Loyalty & Referral App: Coupon and referral system with engagement tracking, push notifications, and retention-focused user flows.

Doctor Booking System: Appointment scheduling platform with availability control, automated appointment logic, and admin supervision.

Digital Contract Platform: Online contract generation, signing, and PDF export system that reduced manual work by 60%.
